

Our health care and retirement security depend on the CalPERS Board of Administration.

On October 10 CalPERS Mails Ballots To Every State Employee in the System *Voting in the CalPERS Election Makes A Difference*

Our retirement system is the largest in the country. It is governed by men and women we help to elect. This October it is important that we stand up and make a choice to ensure a better future. The person we elect to the CalPERS Board will have a say in:

- *How we stop escalating health care costs and make fundamental changes in a system that doesn't serve the needs of all state employees.*
- *Whether we can afford to retire in California when our state service is complete and whether our health care is protected when we retire.*
- *How our pension investments are used to hold irresponsible corporations accountable to the working families in our country.*

Californians for Public Employee Health and Retirement Security is committed to making sure we have strong and effective representation on the CalPERS Board.
